

Theralink[®] Technologies Announces Corporate Name Change

DENVER, Colorado — September 24, 2020 —Theralink Technologies (OTC: OBMP) (“Theralink” or the “Company”), formerly OncBioMune Pharmaceuticals, Inc., a molecular profiling company specializing in patented, biomarker assay services that target multiple areas of oncology, today announced the completion of its previously announced corporate name change to Theralink Technologies, Inc., effective Thursday, September 24, 2020.

"We are excited to officially complete our corporate name change to Theralink Technologies following the recent OncBioMune Pharmaceuticals' Asset Purchase of Avant. The new name, Theralink, more accurately reflects our mission to deliver precision medicine solutions that accelerate drug discovery and development for biopharma companies. Further, our solutions are intended to help improve insights for oncologists to better tailor therapy selection for cancer patients," said Mick Ruxin, M.D., President and CEO of Theralink Technologies, Inc.

In addition to changing the name of the Corporation to Theralink Technologies, Inc. with the Secretary of State of the State of Nevada, the number of shares that the Corporation will have the authority to issue has been increased to 12,000,026,667 shares of which 12,000,000,000 shares will be common stock having a par value of \$0.0001 per share (the "Common Stock") and 26,667 shares will be preferred stock having a par value of \$0.0001 per share (the "Preferred Stock"). Upon the effectiveness of the increase in authorized, all outstanding Series D-1 and Series D-2 Convertible Preferred Stock of the Company will automatically convert into approximately 5.1 billion shares of Common Stock.

About Theralink Technologies, Inc.

Theralink Technologies is a proteomics-based, molecular profiling company, located in Golden, Colorado that uniquely specializes in patented, phosphoprotein and protein biomarker assay services that target multiple areas of oncology. Theralink provides precision oncology data through its powerful Theralink[®] Reverse Phase Protein Array (RPPA) assays to assist the biopharmaceutical industry and clinical oncologists in identifying likely responders and non-responders to both FDA-approved and investigational drug treatments. We intend to help improve cancer outcomes for patients, reveal therapeutic options for oncologists, and support biopharmaceutical drug development by using a beyond-genomics approach to molecular profiling that directly measures drug target levels and activity.
